Bilateral Meetings

- Friday 15:45 - 17:00

Description

China Pocy Group is a diverse company engaged in investment, education, technology, trade, industrial real estate, new energy and biomedicine. With ¥500 million of registered capital, Pocy is able to make ¥10 billion of investment at least each year. Headquartered in Beijing, Pocy has affiliates in a number of cities, including Tianjin, Chengdu, Guiyang, Shijiazhuang and Nanning.

China Pocy Group is the strategic partner of UNESCO, the Best Partner of Ministry of Education, a leading investor and operator in education and the corporate model for CSR in China. With "Operate City and Create Prosperity" as the business philosophy, the company derives development momentum from its "Beijing-Tianjin-Hebei + Yunnan-Guizhou-Sichuan" strategy that aims to develop smart, eco-friendly and livable cities with favorable business environment. The company is also proactively innovating and upgrading its market-driven operation model in which the government takes the lead and the company is responsible for business operation. With the win-win collaboration between the government and business, the company is able to ensure economic growth and people's livelihood in urban development. With the mission to improve the habitat, quality of life and value in cities, the Group has invested in a series of projects including Guizhou Qingzhen Vocational Education City and Beijing Caofeidian International Vocational Education City. In July 2017, Beijing Caofeidian International Vocational Education City was recognized as the "World Vocational Education and Training Base".

Situated at the center of Tangshan Bay Eco-city, Beijing Caofeidian International Vocational Education City is jointly invested and developed by China Pocy Group and Tangshan Caofeidian Development Investment Group Corporation. The project covers an area of 197,000 km² and costs ¥38 billion in total. By ways of building, relocating and retrofitting, and through integrating school with enterprise, education with city and industry with city, it plans to introduce educational resources both home and abroad and thereupon creates 17 internationalized vocational institutions to cluster 200,000 people in the educational zone of the city. In response to the Belt and Road Initiative, it is designed to be the national hub in supplying blue-collar workers and will be further forged as the Chinese Craftsman Valley – the cradle of vocational education and craftsman. At present, Tangshan Experimental Vocational School and Caofeidian College of Technology have began enrolling students.
