- Friday 15:45 - 17:00

Description

CS VFL -TEC water treatment technology co., LTD. is committed to small and middle-size sewage and specific industrial wastewater treatment and reuse, is VFL Europe's only partner in China. VFL technology is a world leading sewage treatment technology for small and middle scale. Over the past 30 years, VFL has been widely used in over 35 countries. The advantage and reliability of VFL technology have been verified by professional institutions and companies like PIA, DIBT and VEOLIA. Now VFL technology has demonstrated that its superiorities can perfectly meets the growing requirements of China's urbanization and new rural construction.

Our business covers various fields like consulting and technical services provider in wastewater treatment solution and equipment, EPC projects, wastewater treatment plant's operation and maintenance contractor, BOT construction, wastewater treatment plant's operation and reconstruction, etc. CS VFL -TEC was established on July 2013, now more than 20 projects are operating in Beijing, Anhui, Hunan, Fujian, Jilin, Guangdong, Guangxi, Yunnan, Shanxi and other cities in China, and have been endorsed by local governments.

Typical projects: Songzhuang black and smelly water treatment project in Tongzhou district, Beiliu and Wangyu rural residual wastewater treatment projects in Changping district. On November 2016, Clothing manufacture wastewater treatment project in Huzhou, Zhejiang started to run and operate, which is a significate step for us to enter the clothing manufacture wastewater treatment industry .

We love nature, respect for science, with high sense of responsibility and attitude, we provide professional solution and service for our clients in water reuse industry. Along with the rapid development of the company and increasing contracts, more and more expertise and talents are needed, we sincerely invite you to join us and let us build a bright future together!
